

## Project Management Institute - PMI

More companies are finding the key projects that will make a difference to their operations require capable and competent project managers. Project Management (PM) is a challenging role blending cost, quality and scheduling strategies to meet objectives. The goal of our association is to enhance the skills of our members and recognition in the community.

PMI is a global non-for-profit professional association with more than 450,000 members and credential holders in 185 countries. PMI prescribes Eleven standards, a common framework and language for project execution across industries and regions. PMI certifies project managers worldwide in six different credentials – Certified Associate in Project Management (CAPM), Scheduling Professional (PMI-SP), Risk Management Professional (PMI-RMP), Agile Certified Professional (PMI-ACP SM), Project Management Professional (PMP) and Program Management Professional (PgMP).

PMI also offers continuing education for credential maintenance, accreditation of Project Management programs around the world and regularly adds Registered Education Providers (REPs). These initiatives help in bringing quality in our project management methodologies and increases awareness among the practicing industries.

More information about PMI can be found at <http://www.pmi.org/>

## About Metro St. Louis PMI Chapter

Metro St. Louis PMI Chapter was formed in 1994 by 25 members. The chapter has grown to over 1200 members in 2011. The chapter operates as a non-profit organization run entirely on volunteer support.

The chapter's vision is to increase the awareness and value of professional project management for practitioners and organizations in the community we serve. The Chapter's mission is to advance the profession of project management by creating a culture and community that facilitates professional development and volunteerism.

The chapter organizes many events throughout the year and thrives to bring project management professionals together by providing networking and learning opportunities.

- Chapter Dinner meetings are a great way to meet project managers in the area and to learn something new with presentations on a variety of topics ranging from Risk and Program management to Work and life balance topics. Tutorials prior to the dinner meetings provide additional learning opportunities.
- Alternate Venue Breakfast and Lunch meetings provide opportunities for project managers to network and learn without taking time from their regular schedule.
- Career Fairs, International Project Management Day and Annual Member Recognition events are among other events the chapter organizes to provide better networking opportunities to members.
- The Chapter also provides a unique program for Mentoring. Participating members are provided experienced Mentors based on their need, and the progress is monitored on a regular basis.
- Volunteering for the chapter is an excellent way to get involved with the community and work with Board members, chapter leaders, industry leaders and project management experts.

Visit <http://www.stlpmi.org/> for more information about chapter events and programs.
